# pizazz multi-mounts®

UNIQUE  
\* PATENTED \*  
FUNCTIONALITY

Change your graphics easily and safely

## Standard Parts

Are **A** + **B** + **C** Parts which are sold as a set - Optional extra **D** Parts are sold separately

The internal back wall of **A Parts** are designed to accommodate the head of an 8 or 9 gauge countersunk screw or bolt.

**B Parts** screw into **A** or **D Parts**.

**C Parts** screw into **B Parts**.

**D Parts** screw between **A** and **B Parts**.

**Important:**  
Use approved wall anchors when required.

**Extra Spacers (D Parts)** are used to hold more panels and/or increase the standoff distance.

For part sizes, panel thickness and weight capacities, visit [www.pizazzsystems.com](http://www.pizazzsystems.com)

## Graphic Displays

Graphics are held between back panels and front panels

Patented Multimounts unique functionality makes:

- installation is simple
- graphic changes are easy, fast and safe because when the **C Parts** are unscrewed the back panel remains secured in place

## Multiple Layers

Panels are secured between **A** + **D** Parts and **D** + **B** Parts and **B** + **C** Parts

Using Extra Spacers (**D Parts**) give you more creative options including:

- multiple panel layers with different colours and textures
- offsetting some layers
- **D Parts** can also be used to increase the standoff distance

## Sales Tools

Are available, including the Monomount + Multimount display pack below
